Andrew Landim

Technical Lead  
Campina Grande, Paraíba, Brazil

Summary

Full Stack Developer | Web & Mobile

Experienced Full Stack Developer proficient in a range of technologies to design, develop, and maintain robust web and mobile applications. Skilled in both frontend and backend development, with expertise in:

Frontend: React, Angular, Next.js, Svelte  
Backend: Express.js (Node.js), Laravel (PHP), Flask (Python),  
Spring (Java)  
Mobile: Android

Experience

Paneas  
1 year 6 months  
  
Technical Lead  
March 2025 - Present (4 months)

As a Tech Lead, I guide the technical direction of the team, ensuring architectural consistency, code quality, and alignment with business objectives. I facilitate technical discussions, mentor developers, and help define best practices to improve our delivery processes. I work closely with product managers and other stakeholders to translate requirements into scalable solutions, while fostering a collaborative and high-performance team environment.

Full Stack Developer  
January 2024 - March 2025 (1 year 3 months)  
  
Worked with FastAPI (Python) on the backend and Angular on the frontend to deliver robust and modern application features. A key achievement in this role was integrating an AI-powered chatbot, enhancing the overall user experience. During this period, I also stepped into the role of tech lead for my squad, taking

responsibility for technical decisions, stakeholder alignment, and supporting the team in building scalable, high-quality solutions.

André Landim

Full Stack Developer

January 2011 - January 2024 (13 years 1 month)

Brazil

Throughout my journey, I've worked with a wide range of technologies across various projects. Early on, I used Android, jQuery, and PHP for mobile and web development. I also worked with C++ for data processing applications.

From 2015 to 2018, I focused on projects involving jQuery, Python, and the development of a Python library for parallel processing. During this period, I continued building apps with Android and started working with Laravel for backend development.

Later, I expanded into Angular, Lumen, and Flarum plugin development, combining modern frontends with lightweight backends. I also gained experience in React Native, React, and TensorFlow, particularly in mobile and AI-based applications.

In more recent years, I've worked with SvelteKit, Express.js, and GitHub Actions, focusing on building scalable web solutions and improving development workflows through automation.

Bank of Brazil

Clerk

March 2016 - January 2021 (4 years 11 months)

Porteiras, Ceará

In the position of clerk at Banco do Brasil, my main role involves direct customer service, with a special focus on rural financing and corporate client support. My responsibilities encompass understanding customer needs and executing banking operations accurately and securely, while also ensuring the efficient organization and management of essential documents for the process.
